The technical rules are :

European Standard EN ISO 20344 : 2011 Personal protective equipment - test methods for footwear

European Standard EN ISO 20345 : 2011 : Personal protective equipment - Safety footwear

It is a category II product

Requirement of the standard EN ISO 20345 : 2011 concerning the value of the coefficient of friction of ceramic tiles floor with detergent solution and steel floor with glycerol (SRC)

Requirement of the paragraph 5.8.1. Design of the standard EN ISO 20345 : 2011 concerning cleated outsole.

At the date of certificate, the product is in compliance with Annex XVII of European REACH regulation (n° 1907/2006 and revisions)

## Additional requirements :

The additional requirements are :

- Closed seat region
- Antistatic footwear
- Energy absorption of seat region
- Fuel oil resistance
- Penetration resistance
- Water resistance (through test or machine method)
- Outsole :Resistance to hot contact

# MARKING - PACKAGING

## Information printed on the footwear :

- \* Logo of the Manufacturer
- \* Logo 
- \* Manufacturer's type designation
- \* Postal address of manufacturer
- \* Footwear's reference T3855 - NASSIO M MTD S3, T3854 - NASSIO M MTD S3
- \* Article code
- \* Size
- \* Year of manufacture and at least quarter
- \* The number and year of the Standard used
- \* The symbol(s) of the additional requirements

## Marking example :

The location of marking is : tongue lining

## Method of marking on the footwear :

printing on tongue lining

## Packaging :

# MEANS OF CONTROL

Generally we control the quality of our safety footwear as follows:

- 1/ we will test some important items, such as impact, compression, slip resistance during development of products. After all properties can meet the requirement, then we will put them into mass production;
- 2/ We will ask our raw material supplier to provide us good reports, for example, steel toecaps, we need good report for impact, compression; penetration resistance insert, we need report for penetration and flex resistance; and for leather we need report for tear strength, tensile strength, WVP and Cr VI. All report must be in accordance with correct standard, such as EN12568:2010 for toecaps and insert; EN ISO 20345:2011 for upper material.
- 3/ Our QC will make sure that the quality check must be performed strictly for each step. From cutting, stitching, lasting, injection and cleaning, if some problems are found, we must solve them at once in order that the good quality shoes can be produced smoothly;
- 4/ We will pick up some finished shoes from warehouse at random , and send them to testing company to perform impact, WR, penetratiom resistance, sole abrasion resistance, bonding strength per each Batch.
- 5/ Before shipment, we will ask our QC to carry out final inspection randomly. The whole goods can be delivered when the result of inspection is positive.

## **PPE subject to ageing :**

Peremption period : 5 years when stored in appropriate conditions (humidity, temperature, clean , ventilated, light). Before use, the footwear shall be visually controlled, in case of deterioration the footwear must be scrapped (abrasion, cut, tear, ...).

## **Declaration of conformity :**
